DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-12, drawn to a solid state imaging device with a reading control means for controlling the readout of the pixels as normal or n-addition mode, classified in class 348, subclass 230.1.
- II. Claim 13-16 and 21-26, drawn to a solid state imaging device with a color correction means, classified in class 348, subclass 223.1.
- II. Claim 17-20 and 27-29, drawn to a solid state imaging device with a gain correction means, classified in class 348, subclass 255.

1. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as in an image pickup device having a color correction means, which does not list the features listed in groups I and III. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2612

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
